

Benefits Administration

Broker Supported Enrollment

Your health insurance broker can set up, manage, and teach you how to use Ease. Worried about rolling out HR software for the first time? Your broker is there to help every step of the way.

EaseConnect

You don't have to be a Fortune 500 company to submit enrollments directly to insurance carriers. EaseConnect is simpler, safer, and gets your employee their ID cards faster. Ask your broker how to get started.

Side-by-Side Plan Comparison

Employees can compare their unique plan details, like copays and deductibles in a single view, helping them make better decisions.

Mobile Apps

Access your benefit information on-the-go with the Ease iOS and Android app. Your benefits should be mobile, just like your employees.

Enrollment Progress Dashboards

View a snapshot of enrollment progress for each employee. Email employees directly from Ease to remind them of upcoming enrollment deadlines.

Onboarding & Hiring

Onboarding syncs with Ease's benefits so employees only have to enter their information once. You can determine benefits eligibility for new hires, create and send offer letters, ensure signed and completed W-4 and I-9 information, collect direct deposit information, and digitally collect signatures for compliance documents.
